

SPARTAN CONSTRUCTION LTD

QUALITY ASSURANCE POLICY

The Board of Directors of Spartan Construction strongly support the need for quality assurance in the design and construction industry.

We are committed to delivering the highest quality of services to our customers. We will achieve this by applying innovative and systematic techniques in our quality systems development to ensure that we always understand well our customer's needs and accurately communicate these needs to our employees and all our construction partners.

The key objectives of our quality systems management are driven by a determination to develop partnerships with our customers based on integrity and trust, to ensure full compliance of the end product with specified standards, completion on time and achievement of budget requirements.

The Spartan culture is a learning culture within which our quality systems form a dynamic base. Our employees are trained in quality techniques at both office and site level so as to provide a seamless communication of design and construction objectives and provide essential feedback for review and continuous improvement of systems.

Our quality systems are based on the ISO 9000 design and construction quality standards and we aim to obtain official ISO registration in the near future.

These objectives can be summarized by the Spartan vision:

“leadership, innovation, and unrivalled delivery”

Greg Dodd
SPARTAN GENERAL MANAGER
